

GM110 VEHICLE TRACKER

Trakpro's best-selling GM110 is a multifunction in-vehicle GPS tracker that packs big features into a compact unit.

Vehicle telemetry captured by the GM110 can be viewed online in real-time through the

Trakpro online platform, giving you a live snapshot of your fleet and asset.

The entry-level GM110 can also be upgraded to include a remote engine immobiliser and 'panic button' alarm to increase driver safety.

KEY FEATURES OF THE TRAKPRO GM110:

- Battery Backup (up to 6 hours)
- High-sensitivity GPS chipset for faster locating
- Real-time tracking and reporting
- Built-in GSM and GPS antenna
- Wide voltage input range (9-36V)
- Built-in vibration sensor
- Low-battery alarm
- Configurable by 'time' or 'distance', with 'heading change' updates for better resolution track reporting
- Engine immobiliser (optional)
- Driver 'panic button' alarm (optional)
