

GM 370 Vehicle Tracker

Trakpro

GM370 VEHICLE TRACKER

SOS

Trakpro's GM370 is an in-vehicle GPS tracker that communicates vehicle telemetry and positioning to your Trakpro platform, producing real-time data viewable online from anywhere.

The GM370 delivers a wide range of functionality, from basic vehicle tracking

through to advance I/O monitoring, full AVL supervision to emergency services and security applications.

The unit is fully upgradeable and customisable, and can be enhanced with accessories such as Trakpro's eSafe black box or eFuel monitor.

KEY FEATURES OF THE GM370:

- Compact unit size
- Quick and easy installation
- Quad band GSM/GPRS modem
- Dual band 850/1900 or 900/1800/2100 modem
- Embedded cellular/GPS antenna
- Internal backup battery
- Geo-fence management and alert
- Remote immobiliser
- Configurable vehicle speed alert to monitor driver behaviour
- Panic button for driver safety
- Over-the air upgrades and configuration
